Kushagra Jain

Bhopal, Madhya Pradesh, India | +91-6388943930 | kushagrajainaj2003@gmail.com | LinkedIn | GitHub

Summary

Computer Science undergraduate with hands-on experience transforming raw data into meaningful business insights. Skilled in writing SQL queries, working with relational databases, cleaning and validating datasets, and developing dashboards and reporting solutions using Python and Power BI. Experienced across the end-to-end analytics lifecycle, from data extraction and analysis to identifying trends, uncovering anomalies, and presenting actionable recommendations through clear visualizations and reports. Strong foundation in statistics, machine learning, and data analysis, combined with the ability to quickly learn new tools, technologies, and business domains..

Experience

Elite Software Jan 2026 – Jul 2026
Freelance Frontend Developer & UX Designer *Remote*

- Delivered project-based frontend and UX work from brief to handover, turning written requirements into wireframes and responsive, animated interfaces
- Kept layouts consistent across desktop and mobile, and tested every interface across devices and browsers before delivery
- Managed several project deadlines at once, shared regular progress updates, and revised designs based on team feedback

Education

D.Y. Patil College of Engineering, Akurdi Pune
B.Tech in Computer Science and Engineering; CGPA: 8.2/10 *2022 – 2026*

Technical Skills

Data Analysis & Reporting: Excel, Power BI, SQL, data cleaning & validation, dashboards, data modelling
Databases: MySQL, MongoDB, database design, hybrid vector + SQL retrieval
Programming: Python (Pandas, NumPy), C++, JavaScript
Data & ML Tooling: FAISS (vector search), LangGraph, FastAPI, Streamlit, Jupyter, Hugging Face
Other Tools: Git, GitHub, Postman, Docker, GCP, AWS (basics)

Relevant Projects

Car Sales Analysis Dashboard | *Power BI, Excel, CSV, Data Modelling* Sep 2026

- Built a single-page interactive Power BI dashboard combining 72,435 used-car listings (7 brands, 1996–2020) with Norway monthly sales data (65 makes, 2007–2017, about 1.35M units)
- Designed KPI cards for price, tax, and sales quantity, a yearly sales trend line, a market-share pie chart by make, and price comparisons by brand and model
- Added slicers for year, fuel type, and brand so every visual filters together, and linked a brand table with logos to keep the report readable for non-technical viewers
- Gives buyers and analysts one view of pricing, running costs, and market trends in place of raw spreadsheets

RAG-Based Technical Documentation Assistant | *LangGraph (StateGraph), FastAPI, Groq LLM, Sentence-Transformers* Jul 2026

- Built a retrieval pipeline that scores retrieved documents and rewrites the query when results are weak, so poor matches are not turned into confident but wrong answers
- Tracks and reports confidence in each answer, the same habit needed to validate analytical findings before sharing them

AI Fashion Outfit Recommendation System | *Python, FAISS, FashionCLIP, Gemini, Streamlit* Mar 2026

- Built for a DareXAI internship assignment: an explainable scoring model that blends embedding similarity, item-pairing priors, and colour/occasion rules
- Presented results in a Streamlit interface that gives free, data-driven styling suggestions

Certifications, Languages & Interests

Certifications: Fundamentals of Deep Learning, NVIDIA (Mar 2025)
Languages: Hindi, English
Interests: Swimming, Cricket, Badminton
